2017
IDIBAPS AUTUMN SEMINARS

OCTOBER
NOVEMBER
DECEMBER

Venue
Esteve Auditorium
idibaps-CEK Building
Rosselló 149-153, Barcelona
info@idibaps.org

October 31th - 15.00h
Pluripotent stem cells for modeling neurodegenerative disorders and cell replacement strategies
Josep Mª Canals, PhD
IDIBAPS Researcher
Pathophysiology and treatment of neurodegenerative disorders

November 3th - 13.15h
New therapeutic targets for leukemic stem cells
Ruth M. Risueño, PhD
Josep Carreras Foundation
Leukemia Stem Cell Group

November 7th - 16.00h
Molecular pathogenesis of liver tumors
Jean-Charles Nault, MD PhD
French Institute of Health and Disease Research, Paris

November 16th - 15.00h
Found in translation: mechanisms and therapeutic opportunities in liver disease
Mercedes Fernández Lobato, PhD
IDIBAPS Group Leader
Angiogenesis in liver diseases

November 21th - 15.00h
Searching for the hippocampal neural activity that underlie memory formation and recall
Pablo Jercog, PhD
Postdoctoral researcher
Pathogenesis of autoimmune neuronal disorders

December 11th - 15.00h
Understanding Notch signaling in hematopoietic stem cells
Anna Bigas, PhD
Research Group Leader and Coordinator IMIM, Barcelona

December 13th - 16.00h
NAFLD / NASH
Manuel Romero Gómez, MD PhD
HUU Virgen del Rocío and Institute of Biomedicine of Sevilla (IBIS)

December 21th - 15.00h
Liver cancer: a never ending research challenge
Jordi Bruix, MD PhD
IDIBAPS Team Leader Hepatic oncology

December 22th - 13.15h
Genetics and immunology in melanoma
Susana Puig, PhD
IDIBAPS Team Leader
Melanoma: imaging, genetics and immunology
