

A position at the Predoctoral or Postdoctoral level is currently available at the Laboratori Experimental de Nefrologia i Trasplantament - LENIT group.

The group investigates in the field of immunosuppression after organ transplantation including animal models of chronic renal failure and of organ transplant models. The lab is associated with the Department of Nephrology and Renal Transplantation of the Hospital Clínic performing 170 kidney transplants per year and having a strong academic background.

The successful candidate will be able to develop research projects in different areas in renal transplantation using a wide array of techniques and in vitro and in vivo models.

REQUIREMENTS for Predoctoral position Biology, Biochemistry or Pharmacist degree **obtained AFTER January 2008**. Higher consideration would be given to candidates that have some experience on animal models.

REQUIREMENTS for Postdoctoral position PhD in Biology, Biotechnology or related discipline **obtained AFTER January 2005**. Higher consideration would be given to candidates that have: a good publication record with at least 1-2 first author articles, experience in surgical techniques in rat and mice models, strong background in Molec. Biology, Biochemistry.

CONDITIONS

The selected candidate will be presented to a competitive call for predoctoral or postdoctoral contracts. If his/her CV is competitive enough it would be possible to offer him/her a contract while the call is awarded.

FURTHER INFORMATION & APPLICATIONS

Candidates interested in a visit to the lab or in obtaining further information, please send: a) complete CV and b) the names and contact details (phone and email) of 2 senior researchers familiar with his/her work to the following email address :

Dr. Jordi Rovira

jrovira1@clinic.ub.es indicating **"Postdoctoral"** in the subject of the email.

Deadline for applications September 30, 2010
